

# UNISTREAM™

PLC + HMI in One Unit

# UNISTREAM™

## A new generation of control products by Unitronics

The UniStream™ platform comprises a versatile and powerful CPU, a variety of elegant HMI touch-panels, I/O modules and communication modules that are very easy to install and require minimal wiring.

### Scalability

Automate a single machine – use the new All-in-One – it's as easy as 1-2-3.

- 1 Choose an HMI touch panel – 7", 10.4" or 15.6" model.
- 2 Add a CPU – snap it to the back of the panel.
- 3 Select Uni-I/O™ and Uni-COM™ modules – snap them next to the CPU.

The result is a single, compact controller with an integrated HMI panel and on-board I/Os that suit your specific requirements.

### Expand to control a complex process

A single UniStream™ CPU supports up to 2,048 on-board, local and remote I/Os.

### Use UniStream™ in your factory-wide control project

Integrate third-party devices via Ethernet IP, CANbus or RS232/485 using MODBUS or CANopen. Use the UniLogic™ Message Composer to adapt UniStream™ to other protocols.

I/O or Communication modules are easily snapped to the back of the HMI panel without moving any of the neighboring units.

**The result of  
over 25 years of  
PLC development,  
combined with  
the strongest  
trends in  
automation**

**Connectability**

Access UniStream™ from anywhere at any time

Connect directly via Ethernet or USB, or use VNC to connect mobile phone, tablet, or PC.

Use your browser to surf to UniStream's built-in webserver.

**Profitability**

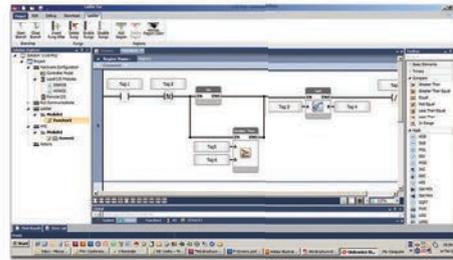

Reduce your Costs

- Free software
- Free support
- Less wiring, less space
- Reduce programming time by 50%:  
faster Time-to-Market

**UniLogic™ Studio**

Work Less – Do More

A new software generation for Control Automation programming:  
Easy to use, time-saving; benefit from the most advanced automation freeware in the field.

**UniApps™**

A Paradigm Change.

An expanding library of value-added PLC embedded Apps.

A UniApp™ for every need – reach your data base, edit data, perform calculations, monitor, troubleshoot, and more.

**Remote Access**

Access your PLC from anywhere at anytime.

# UNISTREAM™

## Building Blocks

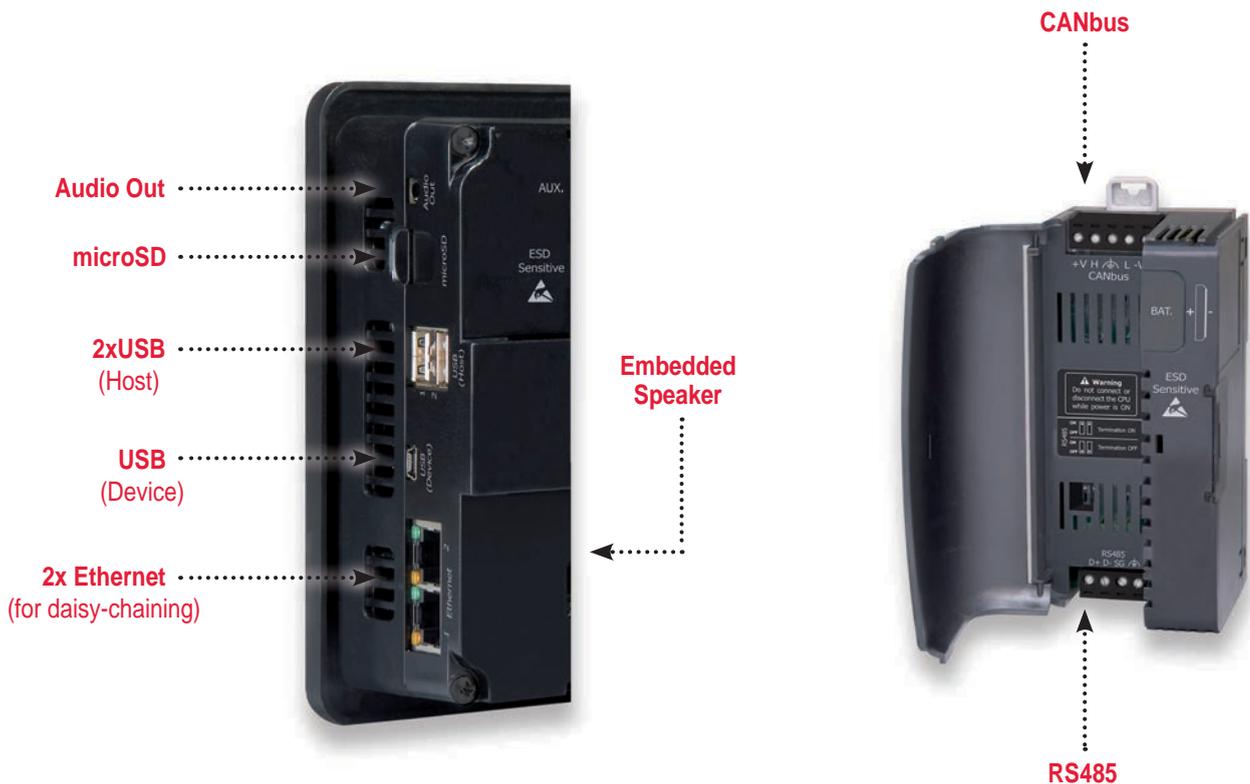

Completely modular in architecture, UniStream™ enables you to create a compact control device that matches your application requirements. Select any UniStream™ HMI panel, add a CPU, and add the right I/O and COM modules to fit your requirements. The result is an all-in-one controller that comprises the optimal configuration for your specific application.

## All-in-One, simple configuration—saves on cabinet space and wiring costs

Use a Local Expansion Adapter to connect UniStream™ to additional I/O modules on a DIN rail.

<sup>(3)</sup> UniStream™ complies with IP66 and NEMA4X only with the audio seal installed, please refer to the installation guide of the HMI panel for information.

# UNISTREAM™ Expandability

## On-Board, Local, and Remote

Select the perfect combination of I/O expansion modules and configure them to fit your application. Snap up to 5 modules on a 10.4" or 15.6" HMI panel, up to 3 on a 7" panel. Expand further either locally or remotely.

Use Short or Long Range Local Expansion Adapters to connect a UniStream™ controller to a row of I/O modules located on a DIN-rail.

Daisy-chain up to 5 Local I/O Expansion Adapters to one controller to further increase the number of I/O modules up to 85 I/O units

## Remote Expansion

### UniStream™ and Vision Remote I/Os

UniStream™ connects to Vision Remote I/O modules via CANbus. A transparent software plug-in enables UniStream™ to communicate data via one or more EX-RC1s at distances up to 1,000 meters.

Unitronics' existing line of Temperature and Load Cell I/O modules, as well as a variety of Digital and Analog modules, allow you to meet all application requirements.

## Work Less - Do More

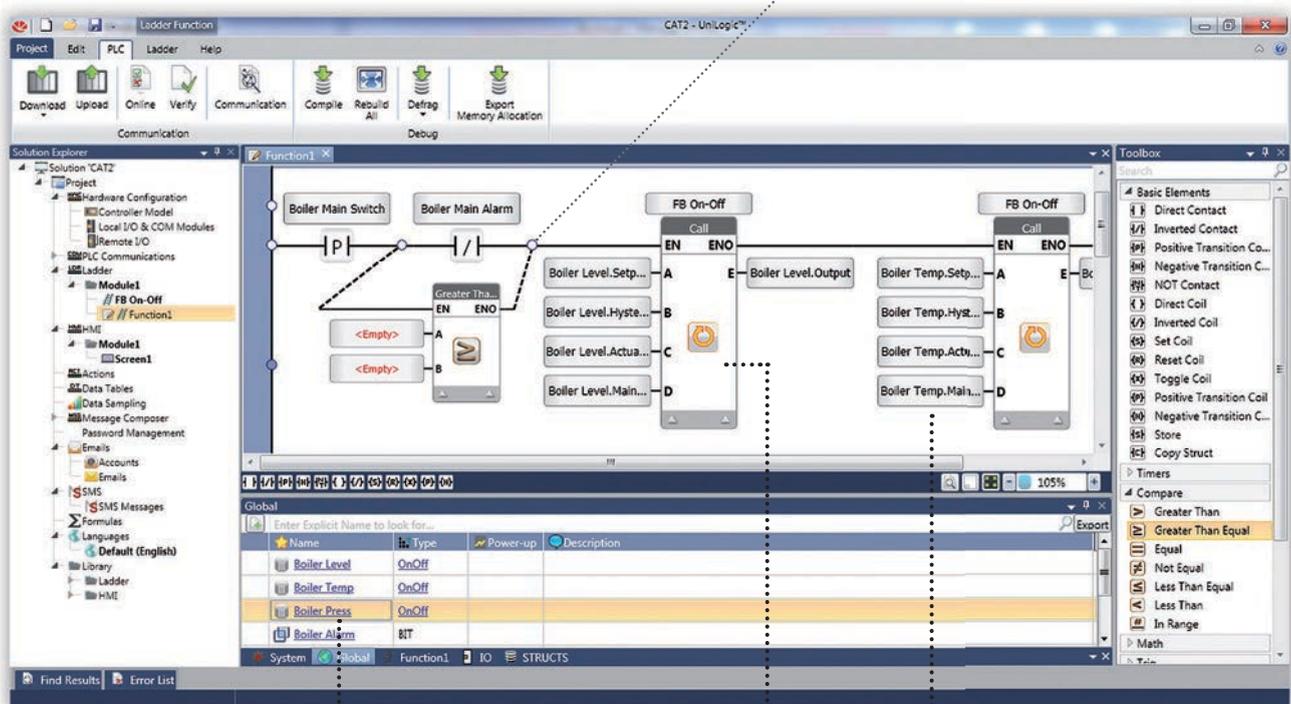

UniLogic™ Studio provides a unified environment for hardware and communication configuration, Ladder, and HMI applications.

### The Ladder Programming Revolution

Cut your program development time in half

- Logically-organized programming environment — everything is visible
- Build-it-once and re-use paradigm
- Incredibly intuitive and easy to use
- Customizable: pin, float, and dock, keyboard shortcuts

Drag & Drop Elements  
and UDFBs

#### STRUCTS

Group different Data Types  
into a single logical unit  
Create your own Data Types  
Use/reuse whenever applicable

#### User Defined Function Blocks

Build Once  
Drag & Drop UDFBs  
Port between applications

#### Tags

In place of addressing  
Name tags and select their  
data types — addressing  
takes care of itself

## All-in-One: Ladder, HMI, Hardware Configuration, and Communication

## Advanced HMI Design

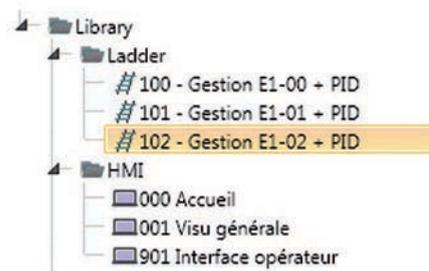

Create the most amazing screen designs

- Multi-layer elements (with opacity)
- Complete object rotation
- Video, animated gifs, sound clips
- Drag & Drop widgets: user controls, pop-ups and more
- Unicode fonts

## UDFB's –Build it Once

- Save UDFBs and HMI screens to your Library
- Use them in any project

## User-Friendly Hardware Configuration

- Drag & Drop modules
- I/O Tags, automatically created
- Easy I/O configuration

Drag & Drop I/O Modules onto the back of a 7" UniStream™ Panel

## Flexible Communications

- Simply Configure & Communicate
- No Ladder Programming needed
- Multiple slave/master definitions per CPU

Multiple slave/master definitions per CPU

### Media files: Video and Audio

Use audio files, either your own or those offered by UniLogic™, to emphasize HMI actions using sounds. Integrate alert, warning or confirmation sounds in your application to clarify the situation to the end user. Use the internal or external speakers.

### Data Tables

Create multiple Data Tables to implement Recipes and manage Data Logs. Populate data tables manually, or import data from Excel files. Use the Data Table Widget to enable user access to the Data Table directly from the UniStream™ screen in real-time.

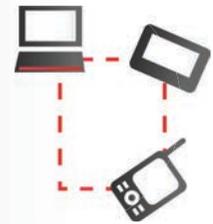

### Multi Language

Switch HMI language with a single touch. Create your application screens in several languages, and enable users to switch between them in real-time from the UniStream™ screen.

### Remote Access

Connect directly via Ethernet or USB, or use VNC to connect a mobile phone, a tablet, or a PC.

### .pdf Viewer

This new HMI widget enables you to display a .pdf, and allow the user to page through it and adjust the Zoom level.

### Data Logging & Trends

Use Data Sampler to simultaneously sample and log hundreds of different inputs. Data Sampler files can be viewed, exported or mailed. Use Trends to display different combinations of inputs in graphical form, both in real time or as histograms.

### Password Protection System

Multilevel password protection. Create permissions for entering UniApps™, uploading the application from UniStream™ to the PC, and for Remote Access.
